### Eidesstattliche Erklärung

Datum

Ich erkläre an Eides statt, dass ich die vorliegende Masterarbeit selbstständig und ohne fremde Hilfe
verfasst, andere als die angegebenen Quellen und Hilfsmittel nicht benutzt bzw. die wörtlich oder
sinngemäß entnommenen Stellen als solche kenntlich gemacht habe. Die vorliegende Masterarbeit ist
mit dem elektronisch übermittelten Textdokument identisch.

Unterschrift

### Acknowledgement

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.

This document is set in Palatino, compiled with pdfIATeX2e and Biber.

The LATEX template from Karl Voit is based on KOMA script and can be found online: https://github.com/novoid/LaTeX-KOMA-template

### **Abstract**

This is a placeholder for the abstract. It summarizes the whole thesis to give a very short overview. Usually, this the abstract is written when the whole thesis text is finished.

#### 1 Introduction

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.

This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.

And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.

After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and

some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.

## 2 Quantum Dot

### 2.1 Processing

#### 2.2 Properties of our dots

Table 2.1: My caption

Quantum dot emission	Energy	Frequency
Center	(1.38 to 2.07) eV	$(3.33 \text{ to } 5.00) \times 10^{14}  \text{Hz}$
Spectral range	$(100 \text{ to } 500) \mu\text{eV}$	$(24.20 \text{ to } 120.90) \times 10^9  \text{Hz}$

### 2.3 Adiabatic Rapid Passage

# 3 Chirp

Hallo [1]

## 4 Scanning Fabry-Pérot Interferometer

#### 4.1 Motivation

Resolve QD emission line.

#### 4.2 Theory

#### 4.2.1 Gaussian Beam

Dot-Spectra in far field is ( $TEM_{00}$ ).

#### 4.2.2 Fabry-Pérot Interferometer

The Fabry-Pérot interferometer is an optical resonator developed by Charles Fabry and Alfred Pérot. An incoming light beam will only be transmitted through the resonator consisting of two semi-transparent mirrors if it fulfils the resonance condition.[3]

#### 4.2.3 Resonator losses an outcoupled light

For the following discussion of the Fabry-Pérot interferometer, a two-mirror-resonator with the reflecting surfaces facing each other and air as medium in between is assumed. The time the light needs for one roundtrip is then given by [2]

$$t_{RT} = \frac{2l}{c} \tag{4.1}$$

where l is the geometrical length of the resonator and c is the speed of light in air.

The photon-decay time  $\tau_c \nu$  of the interferometer is then given by

$$\frac{1}{\tau_c} = -\frac{\ln(R_1 \cdot R_2)}{t_{RT}} \tag{4.2}$$

where  $R_1$  and  $R_2$  are the corresponding intensity reflectivities of the mirrors.

The number of photons at frequency  $\nu$  inside the resonator is described by the differential rate equation

$$\frac{d}{dt}\varphi(t) = -\frac{1}{\tau_c}\varphi(t) \tag{4.3}$$

With a number  $\varphi_s$  of photons at t = the integration gives

$$\varphi(t) = \varphi_s e^{-t/\tau_c} \tag{4.4}$$

#### 4.2.4 Airy distribution of the Fabry-Pérot interferometer

#### 4.2.5 Simulation

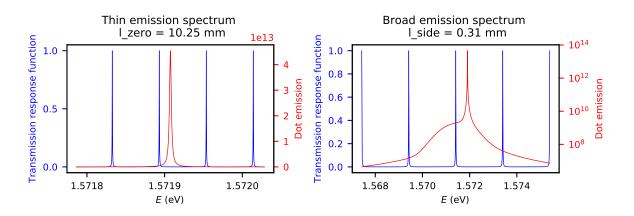

Figure 4.1:

### 4.3 Setup

- 4.3.1 Flat mirrors
- 4.3.2 Concave mirrors
- 4.3.3 Confocal setup
- 4.4 Measurements and Results
